

Your Partner in Quality Welded Steel Tubing

High Quality Tubing

Your satisfaction is our # 1 concern.

- Extensive destructive and non-destructive testing, exceeding industry standards by as much as 200%.
- Capable of withstanding expansion, reducing, flaring, bending, and more.
- corporate-owned metallurgical lab assures you get even faster response as we work together on application development and to trouble shoot technical issues.

Fast and Flexible to meet your changing needs

Quick turn-around and the ability to deliver on-demand, when you need it most.

- Multiple lines and interchangeable tooling to react quickly to your changing needs.
- Preplanning, forecasting and JIT inventory control, to be flexible and deliver on your schedule (even if it changes).
- A variety of end finish capabilities to facilitate mandrel bends, expansions, reductions, etc.
- When you need us, we're available. We guarantee a rapid response to any inquiry, issue, request for quote, etc.

Partnering with you to keep your operation running smoothly

We are committed to your overall success.

- Focusing on lean manufacturing techniques, we work with you to find overall cost savings.
- Innovative thinkers, we solve your product challenges so you won't have to.
- We use the industry's latest technology to provide you with the consistency and precision your processes demand.
